

FUNDAMENTAL OF PROCESS MEASUREMENT

At the end of lesson, the participants should be able to :

1. Overview of basic instrumentation in Hydrocarbon Production
2. Understand and explain general working principle of Pressure sensing devices
3. Describe where Pressure measurement application are required
4. Familiarize with selection of different types of pressure sensing devices and their application in Hydrocarbon Production & Procesess

Duration : 2 Days

F2F HRD Corp SBL Khas Claimable

Course Description :

- 1) Basic Instrumentation
 - Introduction to instrumentation
 - Role of instrumentation in process industry
 - Instrumentation System Control loop
 - Instrument Symbol and Identification
- 2) Pressure Measurement
- 3) Level Measurement
- 4) Temperature Measurement
- 5) Flow Measurement

Target Group :

- Instrument, Operation, Electrical, Mechanical, Professional, Engineer, Quality control & Engineering student.

Programme Methodology :

- Learning Presentation
- Class discussion
- Pictures / Video / Multimedia
- Case Study
